Today's Exploration

- What are the 5 Levels of Agile Planning?
- When & How are the 5 Levels of Planning used?
- What are Agile Analysis approaches and techniques I can use at each level?
- What are pitfalls we might encounter?

As an attendee,
I want to learn about the 5
Levels of Agile Planning,
so that I can have context
for the analysis techniques
we will review!

The 5 Levels of Agile Planning

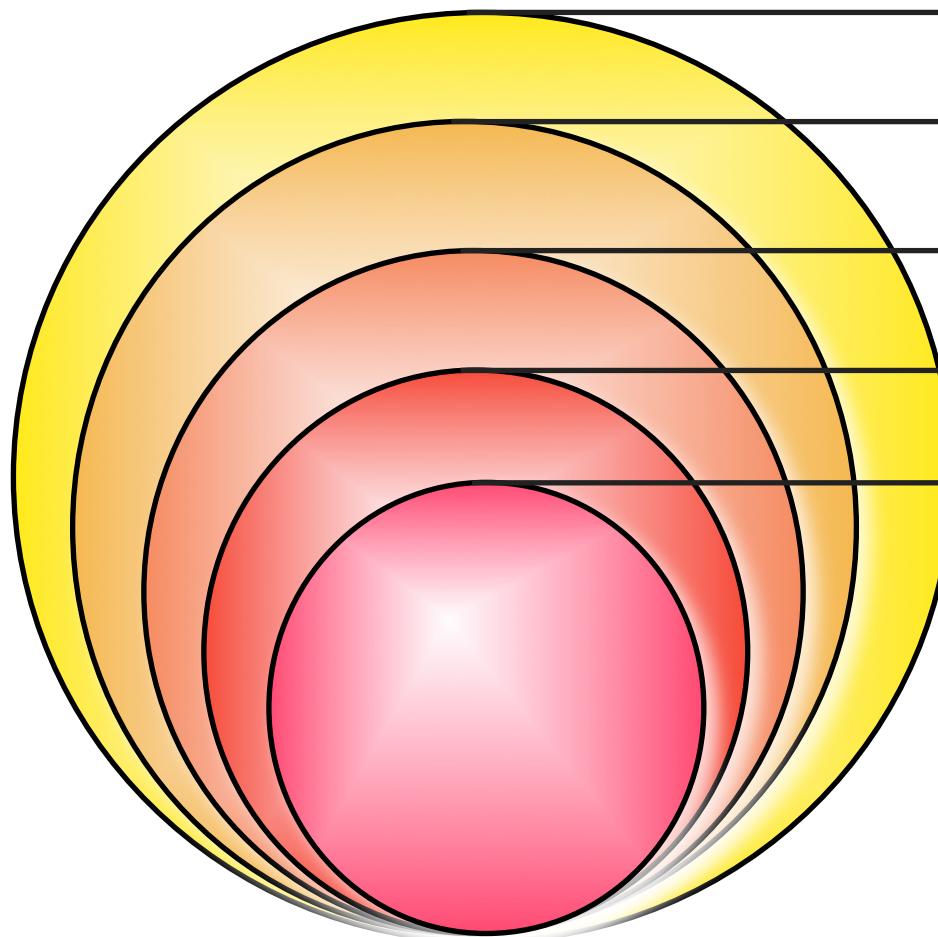

“When preparing for battle, I find that **plans** are **useless**, but **planning** is **indispensable**”

- Dwight D. Eisenhower

5 Levels of Agile Planning

Vision Planning 1

Revised every 6-12 months by the Product Owner

Roadmap Planning 2

Revised quarterly by Team & Stakeholders

Release Planning 3

Every 8-12 weeks by Team & Stakeholders

Increment Planning 4

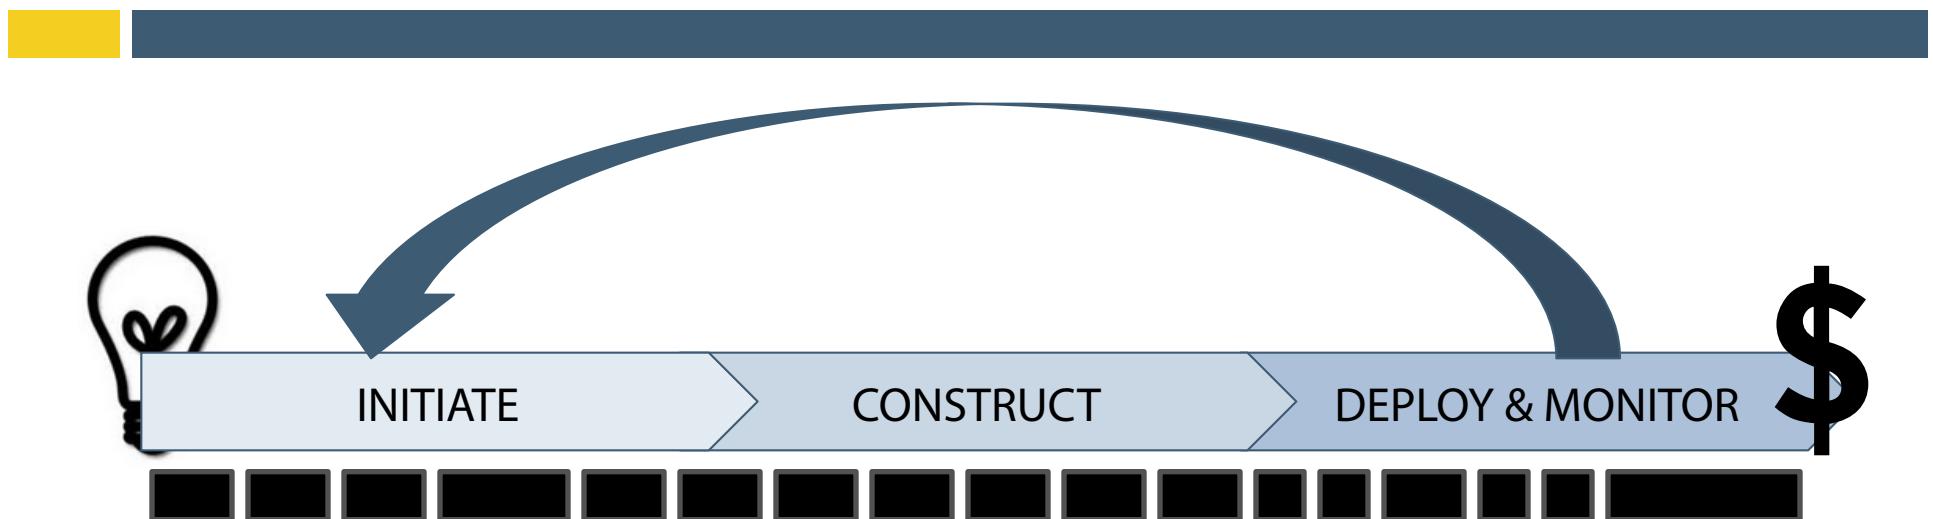

Revised after each increment by Team

Daily Planning 5

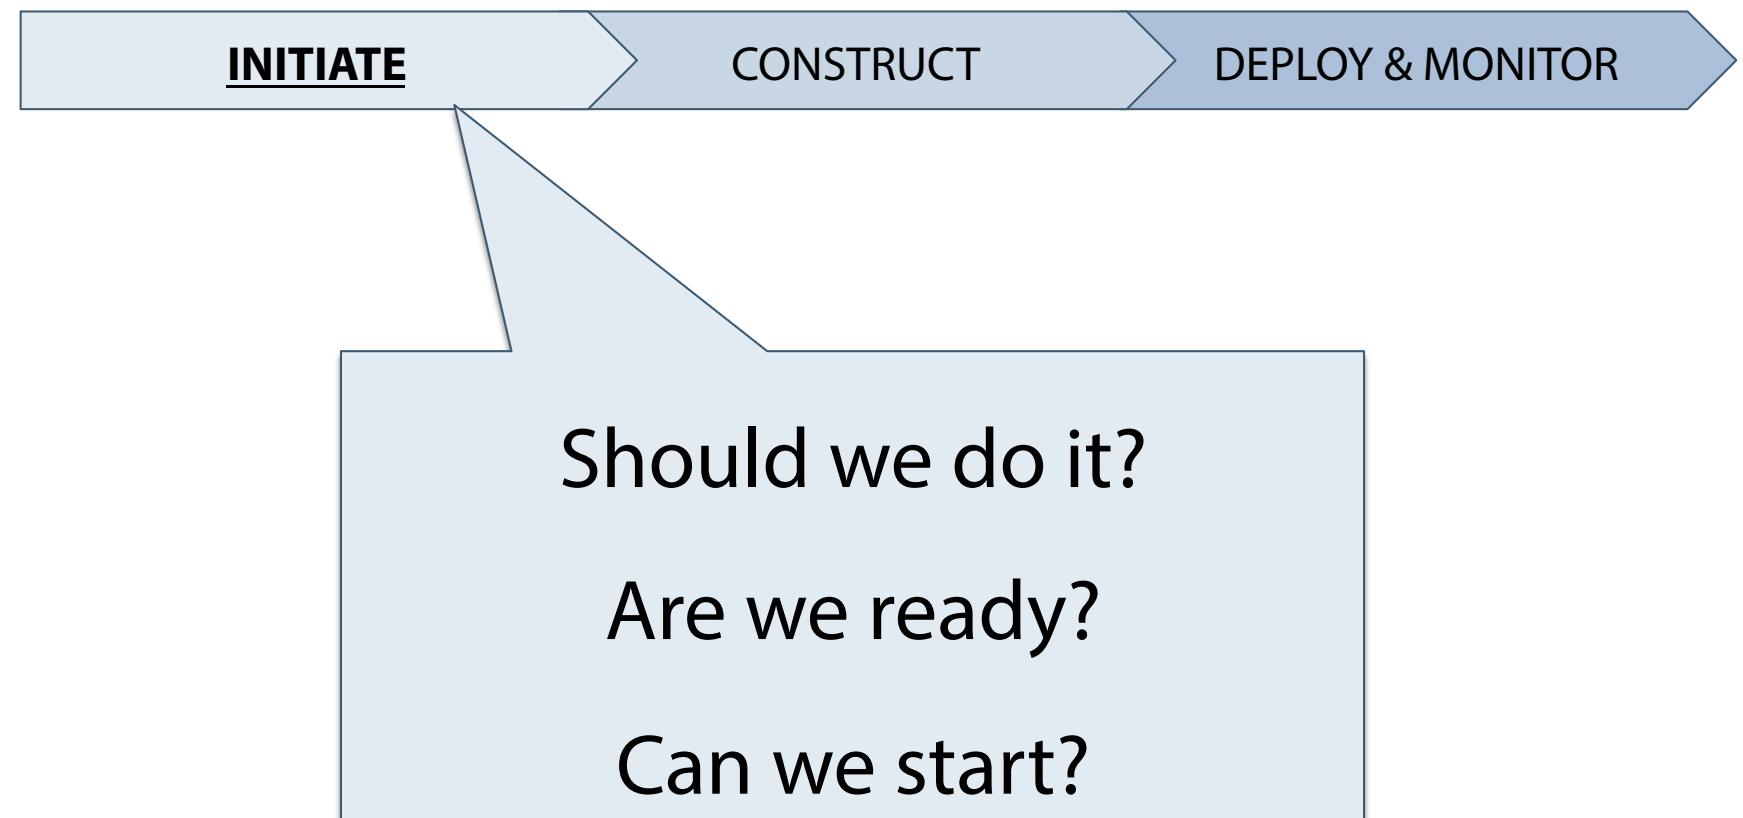

Revised daily by Team Members

Always **accurate**, varying
levels of precision

Criteria for Starting

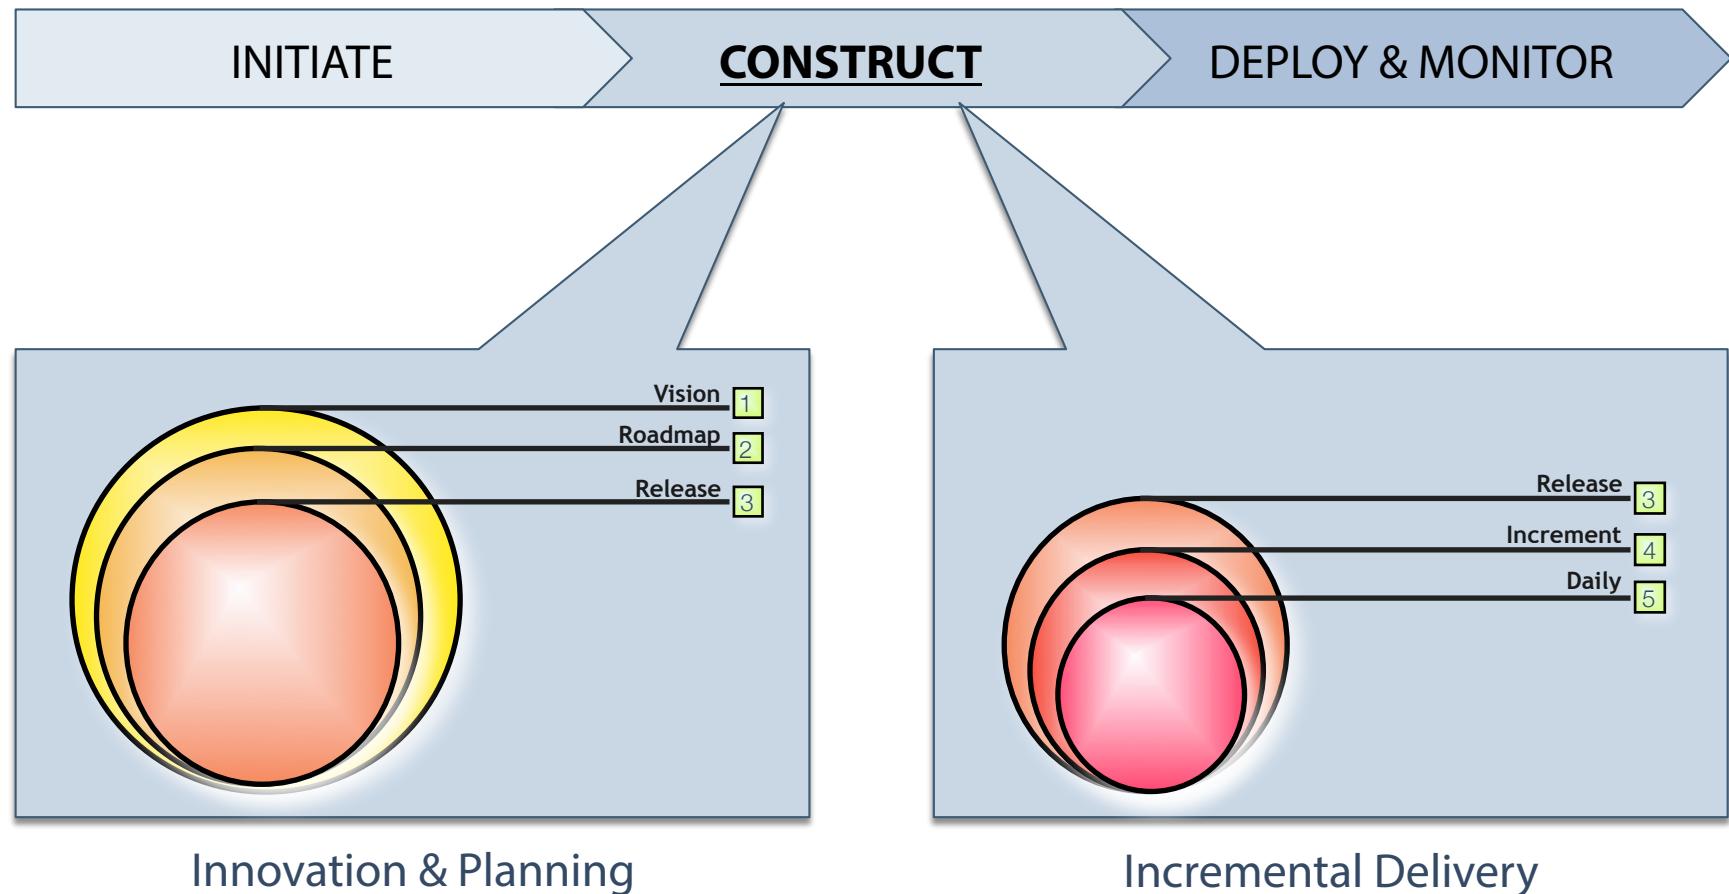

Lightweight Business Case																																	
Epic Name: (Short name for the Epic)	Funnel Entry Date: (Date the Epic entered the Funnel)	Epic Owner: (The name of the Epic Owner)																															
Epic Description: (A description of the Epic; consider using the Epic Value Statement as a starting point. See http://www.scaledagileframework.com/epics/)																																	
Success Criteria: (Describe how the success of the Epic will be measured, for example, 50% increase in shoppers under 25; Availability increases from 93% to 99.9%, etc.)																																	
In Scope: • ... • ... • ...	Out of Scope: • ... • ... • ...	Non-Functional Requirements • ... • ... • ...																															
Stakeholders Sponsors: (List key business sponsors who will be supporting the initiative)																																	
Users and Markets Affected: (Describe the user community of the solution and any markets affected)																																	
Products, Programs, Services Affected: (Identifies products, programs, services, teams, departments, etc. that will be impacted by this Epic)																																	
Impact on Sales, Distribution, Deployment: (Describes any impact on how the product is sold, distributed, or deployed)																																	
<table border="1"> <thead> <tr> <th colspan="2">Lightweight Business Case</th> </tr> </thead> <tbody> <tr> <td>Analysis Summary: (Brief summary of the analysis that has been formed to create the business case.)</td> <td>Go / No-Go: (Go, or No-Go Recommendation)</td> </tr> <tr> <td>Estimated Investment</td> <td>Estimated Story Points: (Estimated story points for the Epic)</td> <td>Estimated Monetary Cost: (Example: Estimated story points * cost per story point)</td> </tr> <tr> <td>Weighted Shortest Job First: (WSJF relative to other Epics in the Analysis queue)</td> <td>Type of Return: (Market share, increased revenue, improved productivity, new markets served, etc.)</td> <td>Estimated Revenue: (Revenue, Return on Investment, or other applicable financial metrics)</td> </tr> <tr> <td colspan="3">In house or Outsourced Development: (Provide recommendations for where the Epic should be developed)</td> </tr> <tr> <td>Estimated development Timeline</td> <td>Start Date: (Estimated start date)</td> <td>Completion date: (Estimated calendar date or estimated number of PIs)</td> </tr> <tr> <td colspan="3">Incremental Implementation Strategy: (Epics are defined as a single whole, but each epic undergoes incremental implementation. Visit http://www.scaledagileframework.com/implementation-strategies-for-business-epics/ for details on potential strategies. Many parts of this guidance can be applied to Architectural Epics)</td> </tr> <tr> <td colspan="3">Sequencing and Dependencies: (Describe any constraints for sequencing the Epic and identify any potential dependencies with other Epics)</td> </tr> <tr> <td colspan="3">Milestones or Checkpoints: (Identify potential milestones or checkpoints for re-evaluation of the Epic)</td> </tr> <tr> <td colspan="3">Attachments: (Other supporting documentation, links to other data, feasibility studies, models, market analysis, etc., that was used in the creation of the business case)</td> </tr> <tr> <td colspan="3">Other Notes and Comments: (Any additional miscellaneous information)</td> </tr> </tbody> </table>			Lightweight Business Case		Analysis Summary: (Brief summary of the analysis that has been formed to create the business case.)	Go / No-Go: (Go, or No-Go Recommendation)	Estimated Investment	Estimated Story Points: (Estimated story points for the Epic)	Estimated Monetary Cost: (Example: Estimated story points * cost per story point)	Weighted Shortest Job First: (WSJF relative to other Epics in the Analysis queue)	Type of Return: (Market share, increased revenue, improved productivity, new markets served, etc.)	Estimated Revenue: (Revenue, Return on Investment, or other applicable financial metrics)	In house or Outsourced Development: (Provide recommendations for where the Epic should be developed)			Estimated development Timeline	Start Date: (Estimated start date)	Completion date: (Estimated calendar date or estimated number of PIs)	Incremental Implementation Strategy: (Epics are defined as a single whole, but each epic undergoes incremental implementation. Visit http://www.scaledagileframework.com/implementation-strategies-for-business-epics/ for details on potential strategies. Many parts of this guidance can be applied to Architectural Epics)			Sequencing and Dependencies: (Describe any constraints for sequencing the Epic and identify any potential dependencies with other Epics)			Milestones or Checkpoints: (Identify potential milestones or checkpoints for re-evaluation of the Epic)			Attachments: (Other supporting documentation, links to other data, feasibility studies, models, market analysis, etc., that was used in the creation of the business case)			Other Notes and Comments: (Any additional miscellaneous information)		
Lightweight Business Case																																	
Analysis Summary: (Brief summary of the analysis that has been formed to create the business case.)	Go / No-Go: (Go, or No-Go Recommendation)																																
Estimated Investment	Estimated Story Points: (Estimated story points for the Epic)	Estimated Monetary Cost: (Example: Estimated story points * cost per story point)																															
Weighted Shortest Job First: (WSJF relative to other Epics in the Analysis queue)	Type of Return: (Market share, increased revenue, improved productivity, new markets served, etc.)	Estimated Revenue: (Revenue, Return on Investment, or other applicable financial metrics)																															
In house or Outsourced Development: (Provide recommendations for where the Epic should be developed)																																	
Estimated development Timeline	Start Date: (Estimated start date)	Completion date: (Estimated calendar date or estimated number of PIs)																															
Incremental Implementation Strategy: (Epics are defined as a single whole, but each epic undergoes incremental implementation. Visit http://www.scaledagileframework.com/implementation-strategies-for-business-epics/ for details on potential strategies. Many parts of this guidance can be applied to Architectural Epics)

Approach & Techniques: Vision Planning

Always **accurate**, varying levels of precision

Elevator Pitch

For <description of the users>

Who <description of what the users need>

The <name of product/service>

is a <description of type of product/service>

That <compelling benefit>

Unlike <description of the competitive alternative>

Our product <primary differentiator>

Technique from Geoffery Moore

Design the Box

Bill Shackelford

THE PRODUCT CANVAS

 NAME The name of the product.	 GOAL Your overarching goal.	 METRICS The measures to determine if the goal has been met.
 TARGET GROUP The users and the customers with their needs. Personas are a great way to describe the target group.	 BIG PICTURE The desired user experience (UX): the user journeys, the product functionality, the visual design, and the nonfunctional properties. Epics, scenarios, storyboards, workflows, design sketches, mock-ups, and constraint stories are helpful techniques.	 PRODUCT DETAILS The goal of the next iteration and specific actionable items to reach the goal. The items are ordered from one to n, and may be captured as detailed user stories.

Vision Workshop

The goal is...

SHARED UNDERSTANDING,
not Shared Documentation

The 7 Product Dimensions

User	Interface	Action	Data	Control	Environment	Quality Attribute
Users interact with the product	The product connects to users, systems, and devices	The product provides capabilities for users	The product includes a repository of data and useful information	The product enforces constraints	The product conforms to physical properties and technology platforms	The product has certain properties that qualify its operation and development

4

Approach & Techniques: Increment Planning

Always **accurate**, varying levels of precision

User Stories are...

not enough.

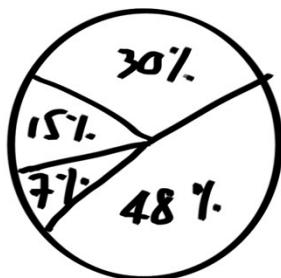

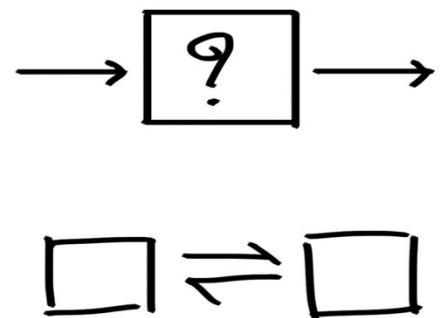

User Stories lack...

all preconditions

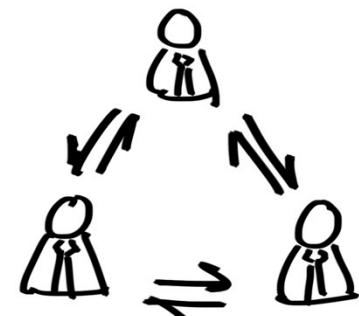

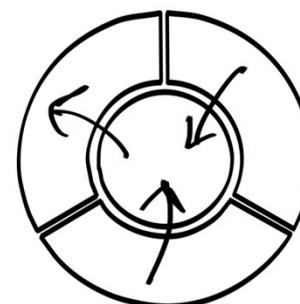

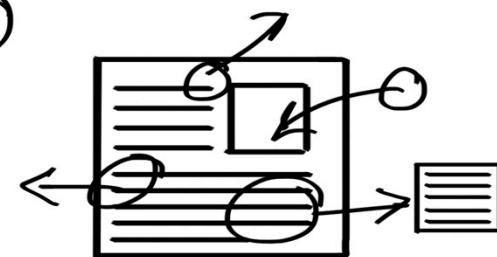

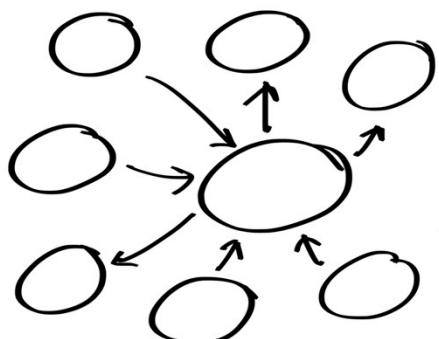

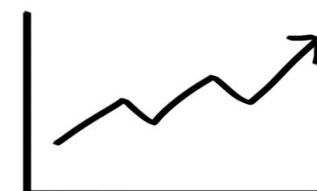

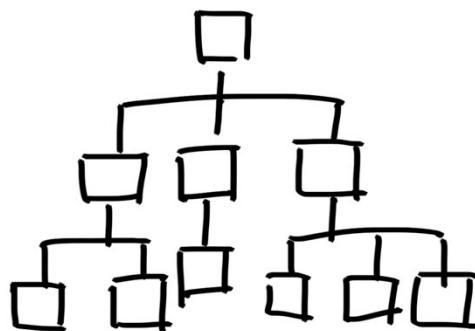

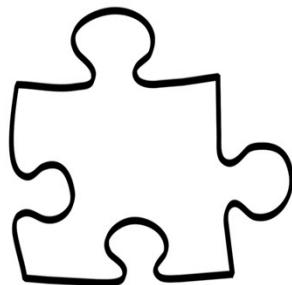

all actor actions

all system responses

$O \rightarrow O \rightarrow \square \rightarrow \diamond$
↓
 $\triangle \rightarrow O \rightarrow \square$

Analysis

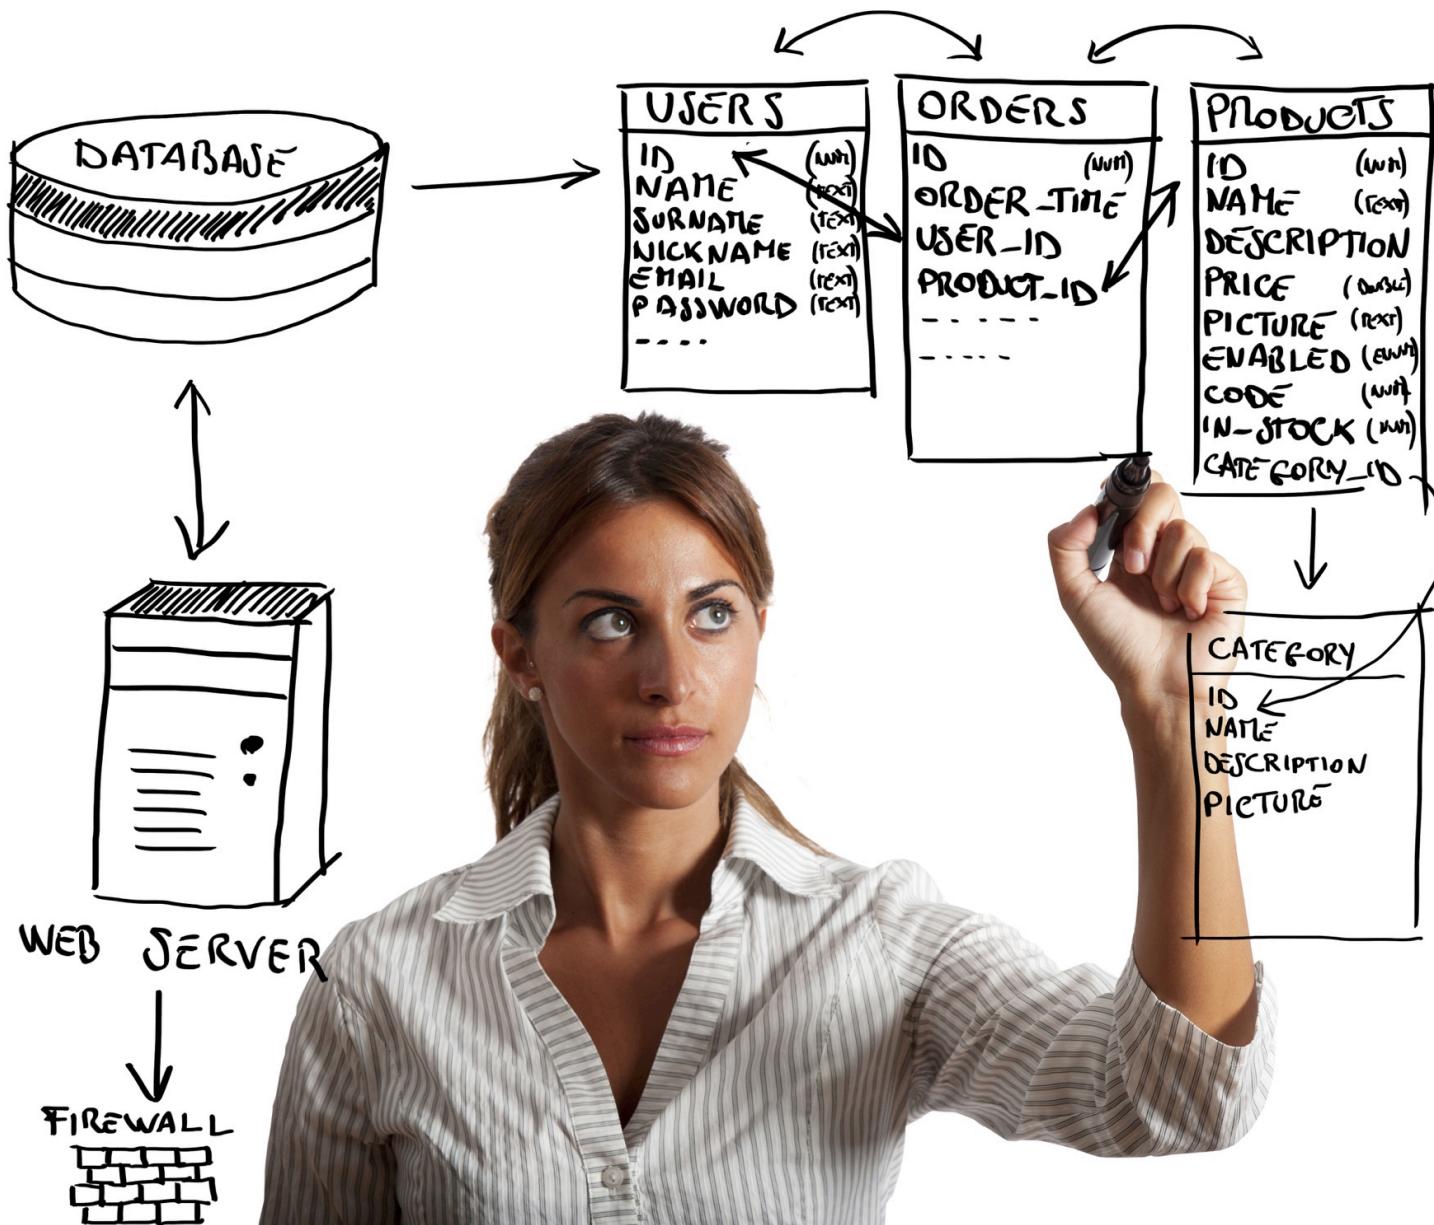

use cases versus user stories

Given [context]

When [event occurs]

Then [outcome]

Given [a shopper is not logged in]
When [they proceed to checkout]
Then [they are prompted to
create an account]

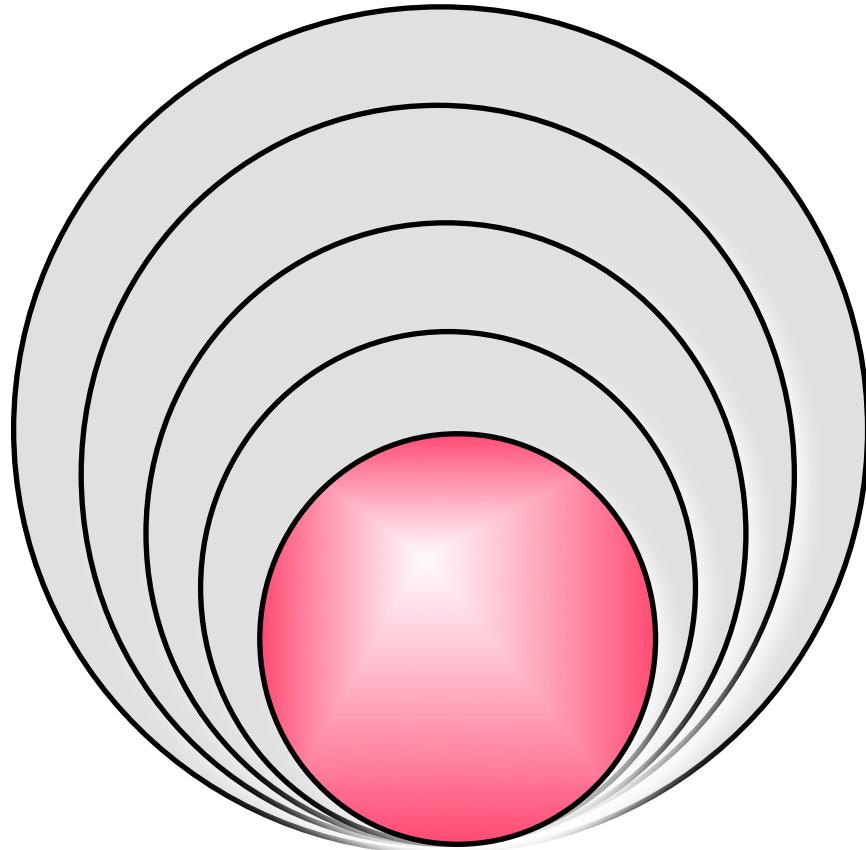

Definition of Ready

Shared Understanding

Sized Correctly

Know “Enough”

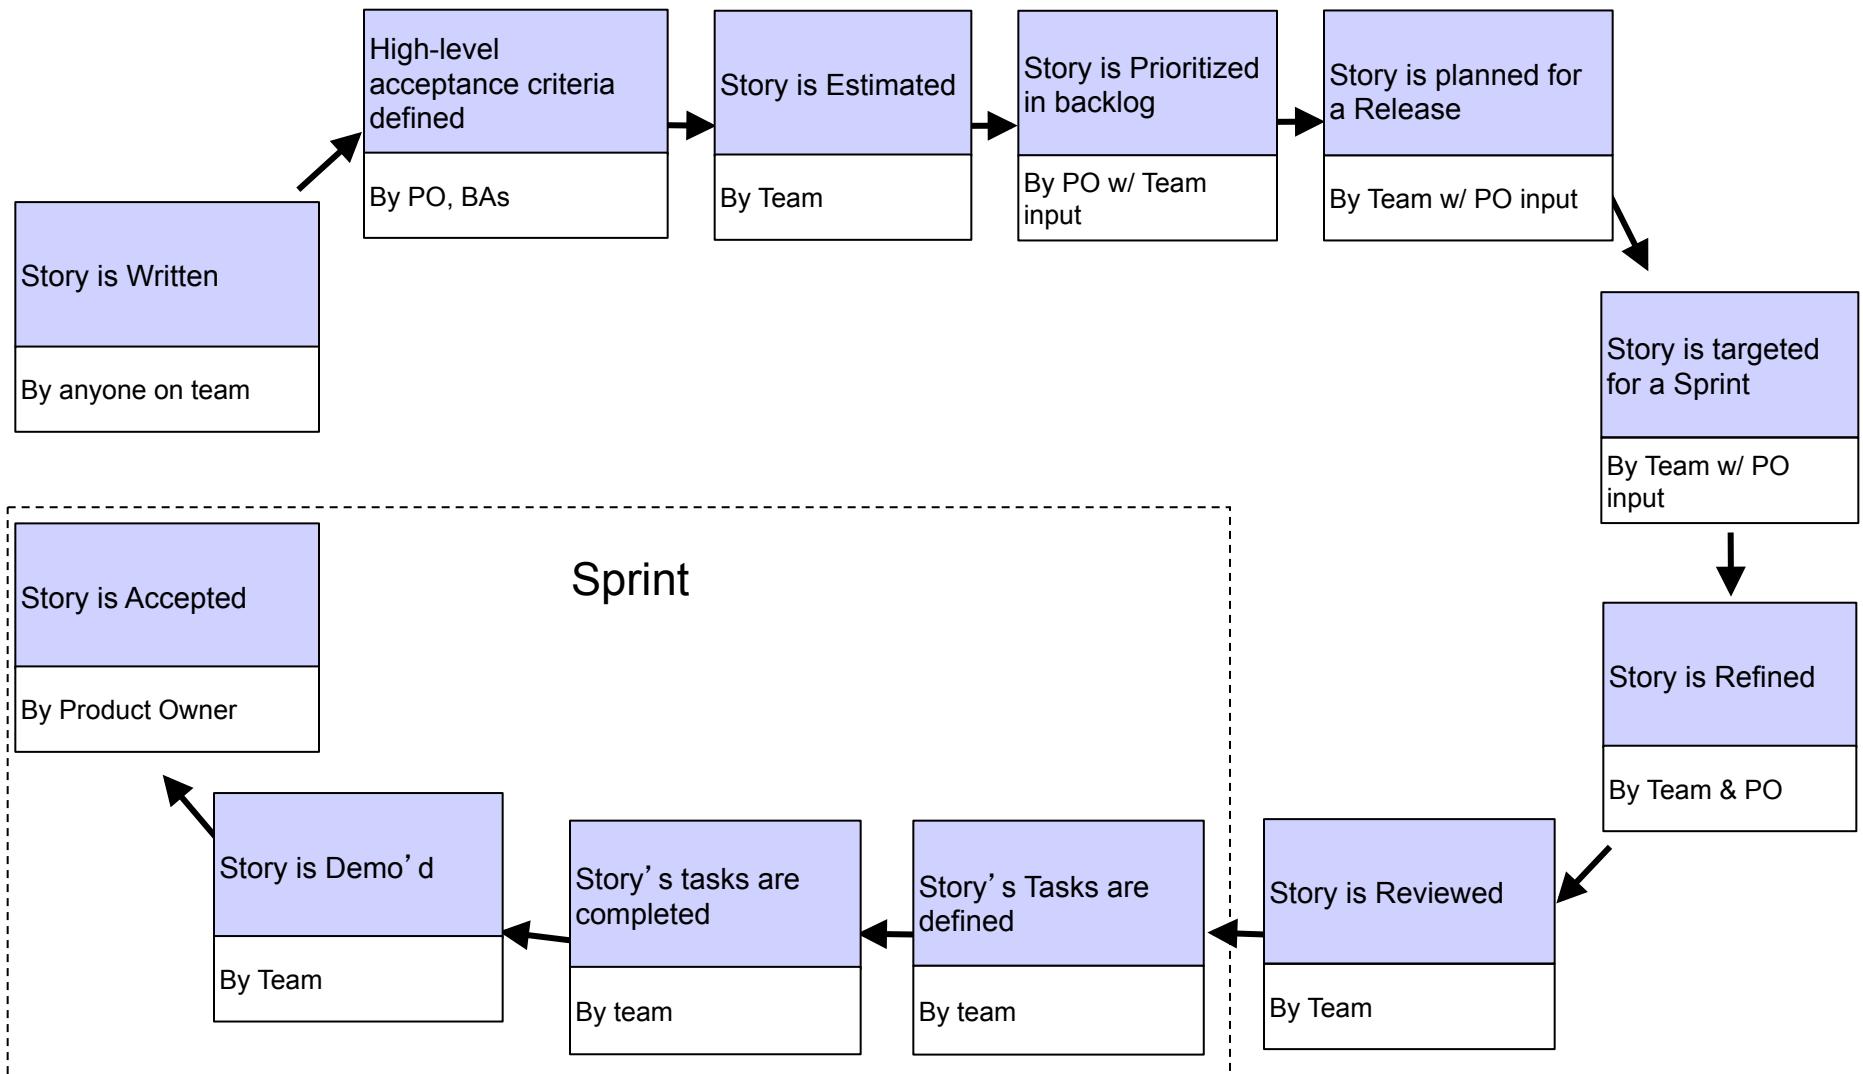

Dependencies Fulfilled
